Tailback Spinal Orthosis

Designed with a single-pull adjustment cord and to produce intracavity pressure to reduce load on the intervertebral discs, Tailback braces provide support for patients recovering from spinal surgery or injury. Available in five models.

Features & Benefits

Universal sizing from 25" to 56" | Optional extender strap for up to 69" waist
Removable cold therapy pad | Single pulley system | Lightweight, latex-free

Tailback42

Lumbar orthosis with sagittal control that extends from L1 past L5

Rigid anterior and posterior panels for support

Part No.: TB042
Suggested HCPC: L0642/L0627

Tailback48

Lumbar-sacral orthosis with sagittal control

T9-S1 rigid anterior and posterior panels

Part No.: TB048
Suggested HCPC: L0648/L0631

Tailback50

Lumbar-sacral orthosis with sagittal control

T9-S1 rigid anterior, posterior and side panels

Part No.: TB050
Suggested HCPC: L0650/L0637

Tailback56

Rigid posterior panel and soft anterior apron

Padded shoulder straps for quick and easy application

Removable panels can be thermoformed for custom fit

Part No.: TB056
Suggested HCPC: L0456/L0457

Tailback64

Rigid anterior and posterior panels restrict rotation and flexion

Shoulder buckles for easy donning and doffing

Removable panels can be thermoformed for custom fit

TLSO Thoracic bar for height adjust

Part No.: TB064
Suggested HCPC: L0464
